 Fire  Flood  Shelter

News Flash August 2015

City of churches, excellent wines, awesome long distance pumping

Good things come in threes and in Adelaide, this will be the case during AFAC early September.

At Bluemont, we celebrate that after having supplied tank farms and refineries in Australia with Hytrans mobile fire-fighting systems, we now supply Fire & Rescue NSW and CFA with Hytrans mobile water supply units.

These premier fire brigades can now quickly transport high volumes of water over long distances. And less pressure loss due to the use of large diameter hose. Come and see us at stand 157.
