

Project type: Road culvert for creek crossing
Location: Winterbottom Lane, Snake Creek Road, Lyndhurst, NSW, Australia
Date: February 2020
Kyowa: 2t Eco-Green rock bags
Client: Blayney Shire Council

Summary: Kyowa rock bags were used to create head walls for this remote country waterway crossing. The creek is often dry but will run with fast flowing flood water very quickly after heavy local rains. The previous crossing had been washed out, so the rock bags not only create the culvert head wall but also protect the whole crossing against scouring.
